Prompt 5

1. Davide Chiazzeze, I think his vulnerability in expressing himself with the class and sharing his journey as an Actor is incredibly inspiring and motivating to hear and watch.
2. Actually, for the very first time since I can remember, I have refrained from using GenAI for this class. I found that I have been very lacking in coming up with thoughts that are of my own, so I have deliberately tried to refrain from using GenAI even for prompts or brainstorming.
3. The final source is myself, rather the culmination of all my experiences and knowledge I have accumulated through a short lifespan so far. It's a fun experience, because for the longest time, my mind was the only communication I ever had. So now, being forced to just think with myself is a cool thing to do.
